

clearScreen()

```
graph TD; A([clearScreen()]) --> B[system("cls"); //system("clear") <MacOS]; B --> C([End]);
```

This flowchart illustrates the execution of the clearScreen() function. It begins with an oval node labeled 'clearScreen()', which points down to a large rectangular process node. This node contains the code 'system("cls"); //system("clear") <MacOS'. From the process node, an arrow points down to an oval node labeled 'End'.

system("cls"); //system("clear") <MacOS

End
